

Infrastructure Improvements for Bicycling and Walking in Marin County since 1998

The following projects were constructed or planned after the Marin County Bicycle Coalition formed in 1998. MCBC offers our sincere thanks to all agencies that have helped to fund, plan, design, construct, and maintain the facilities listed in this document. A comprehensive bicycle and pedestrian network will help achieve the County of Marin's goal of 20 percent of trips being made by bicycling and walking by the year 2020.
